OUTDOORS

## PROFILE

Versatile developer with experience in web development, desktop applications, smartphone and smartwatch apps, and more. Well-versed in a broad range of technical abilities such as Linux server management, network installation, database administration, and proficiency in the operation of many different applications including the Adobe creative softwares, Microsoft Office suite, development toolsets, and more.

## EMPLOYMENT

### 2013 - Present

#### CHURCH BUDGET ENVELOPE CO

##### LEAD DEVELOPER / TECH SUPPORT

Worked on several projects from design to completion including multitenant web applications and a complete redesign of internal operations software. Implemented bug fixes and refactored many existing applications, extracting repeated processes into reusable libraries. Led tech support team for web applications.

### 2010 - 2013

#### COCCA'S PIZZA

##### GENERAL MANAGER

Grew new location to second in revenue of five locations within the first year. Guided young employees with little experience into a highly effective team who tackled problems head-on. Installed and supported a new point-of-sale system company-wide and trained supervisors to use the system to track and improve driver efficiency.

### 2007 - 2010

#### DUNKIN DONUTS

##### ASSISTANT MANAGER

Developed detail-oriented and knowledgeable team who consistently led the district in inspection and test scores.

### 2000 - 2010

#### FORSYTHE FOCAL GROUP

##### DEVELOPER / NETWORK INSTALLER

Developer for web application projects. Pulled and punched down network cable. Installed network hardware.

## FREELANCE

Released three Top 100 apps on the HP WebOS platform. Co-developed Muskingum University Help Desk software. Contributor to and maintainer of several open source projects. Web page and web app development for various companies. Current projects include various apps for Samsung smartwatches.
